## WE DESIGN PEACE OF MIND.

We are touched by water every day – from the moment we step into the morning shower... to the afternoon outside splashing with our children... to the relaxing bath we take to unwind at the end of a hurried day. At Moen, we realize that our products aren't just stylish additions to your home. They're the connections that help make our everyday lives just a little bit better... a little bit easier.

While our products may look remarkable on the outside, what's more important is how they're built on the inside. You can experience the durability and feel the quality materials with every touch. We've spent over five decades focused on making our products the best in the industry. It's with this dedication to trusted performance that we've built our position as a market leader and the #1 faucet brand in North America.

And our reputation is more than just about the products in the box – it's all about the people behind the products and our stellar service. At Moen, service goes beyond our best-in-class warranty – it's the experts who listen and provide assistance. No matter what your need, you can count on Moen to take care of you.

The following pages highlight new and favorite products Moen offers for your kitchen and bath. See [moen.com](http://moen.com) for more products and additional details.

## ADDING VALUE THROUGH SMART INNOVATIONS.

When Al Moen invented the first mixing valve that led to the creation of the single-handle faucet, he established a rich tradition of innovation. More than 70 years later, Moen continues to design meaningful technological advancements to meet the practical needs of customers like you.

### Experience the Difference Inside.

Moen is once again revolutionizing the faucet industry with the introduction of the 1255™ Duralast® cartridge – an exciting, new proprietary cartridge design that offers the feel and function of a new faucet for life.

### Click to Secure Installation.

Standard on many of our bath and kitchen faucets, the Hydrolock® quick-connect installation system allows you to connect hoses and water lines with a simple, secure click. No wrench required.

Fast, easy and confident. Just how installation should be.

### Your 24/7 Online Resource

From inspiring you with ideas and offering product details to helping you install your faucet, moen.com is a valuable resource you can access at any time. Visit today to explore the entire product line, view all your finish options, find a certified installer, download literature and more!

## EVERY DROP MATTERS: OUR COMMITMENT TO SUSTAINABILITY.

Mindful of the environment. At Moen, we realize the importance of both water conservation and waste reduction. That's why, for decades, we have been working on programs that protect the environment.

For example, our entire family of lavatory faucets is certified to meet WaterSense® criteria for performance and efficiency. Moen is continually developing products that conserve our planet's most precious natural resource – without sacrificing your experience.

Moen's voluntary partnership with the Environmental Protection Agency (EPA) WaterSense Program underscores our commitment to advancing the efforts of water efficiency and conserving the water supply. All Moen bathroom faucets are certified to meet WaterSense criteria.

## AT THE HEART OF THE HOME: YOUR KITCHEN FAUCET.

From filling a glass of water to rinsing veggies and washing pots, your kitchen faucet is one of the most used items in your home. Moen offers a host of styles, finishes and functional designs to meet your needs. All featuring durable, dependable operation. Which one is right for you?

### Consider these tips as you narrow in on your selection:

- Look at your cabinet hardware, appliances and lighting fixtures. Choosing a faucet finish to match will give your kitchen a coordinated appearance.
- Faucets with high-arc spouts make it easier to access the sink with larger pots and pans.
- If you cook frequently, you might appreciate the convenience of a single-handle model for one-handed operation.
- Pullout faucets with our patented pause button allow you to interrupt the water stream to reach beyond the sink to fill vases or pitchers – eliminating splashing and the need for a side spray.
- Adding an additional bar/prep faucet is perfect for entertaining or for households with multiple cooks.

### Determine the mounting options on your sink.

- Faucets are measured by the distance between mounting holes, center-to-center.
- Most two-handle kitchen faucets are 8-inch centers, while bar faucets are 4-inch centers.
- If you chose a single-hole mount faucet, extra holes can be covered by a deckplate or used for accessories such as a soap/lotion dispenser.
- Undermount sinks allow unlimited flexibility with faucet position.

#### I-HOLE

#### 3-HOLE, 8" centers

#### 2-HOLE, 4" centers

#### 4-HOLE

#### UNDERMOUNT

### Consider faucet functionality.

**Pullout spout** provides easy access in and around the sink.

**High-arc spout** is perfect for filling large pots.

**Single-handle faucet** offers convenient one-hand operation.

**Two-handle faucet** provides precise temperature adjustment.

**Bar faucet** brings water to entertainment or prep areas.

## SHOPPING GUIDE

**Q: Where can I purchase Moen® products?**

**A:** Visit [moen.com](http://moen.com) and click on WHERE TO BUY on the product detail page of the item you wish to purchase. Use this tool to search for in-store and online options.

**Q: What is the difference between a showroom and a retail store?**

**A:** Retail stores are primarily home improvement centers like Lowe's®, The Home Depot® and Menards®. They have wall displays with many faucets for you to view, compare and purchase in the same day. Showrooms are operated by wholesale distributors, which also can be called kitchen and bath dealers. Those locations often have elaborate displays that showcase coordinated faucet, cabinet and countertop options. Showrooms are staffed by design consultants who are true industry experts.

**Q: The product I want is not on display at my local home improvement center. How do I get it?**

**A:** You may order any faucet style and finish option, as well as matching accessories, through the special order desk at your home improvement center. Or call a local wholesale showroom consultant for assistance.

**Q: Are wholesale showrooms open to the general public?**

**A:** Most wholesalers welcome consumers even if they aren't working with a builder or interior designer. However, it is a good idea to call ahead to schedule an appointment.

## YOUR SINK. YOUR STYLE.

You spend more time at your sink than in any other area of the kitchen, so choosing the right sink is an important decision.

Moen offers a wide selection of quality stainless steel sinks with more than 50 models to choose from in a broad range of shapes, sizes and configurations. All deliver exceptionally quiet service thanks to state-of-the-art sound-deadening properties of our SoundSHIELD™ undercoating.

## DEFINE YOUR DÉCOR.

Moen offers a diverse selection of products for your home in styles that are always on-trend. That means no matter what style you choose, you can be sure that your selection will offer timeless beauty. But which style best fits you? On the right are four fundamental design categories. Compare the descriptions of each to the décor in your home to determine your style. Or use them as a starting point to create the style you always wanted.

### Aberdeen™ 7590 single-handle pullout

Available at showrooms

Shown in Oil Rubbed Bronze  
Also available in Chrome, Glacier,  
and LifeShine® Classic Stainless

## Traditional

- Elegant and refined
- Classic English and European feel
- Abundant detail
- Pattern, trim and tassel

## Transitional

- Combines traditional and contemporary
- Clean feeling that is neither too masculine nor too feminine
- Touchable velvets and leathers

## Modern

- Streamlined, simplistic and uncomplicated
- Influenced by geometric shapes
- Shuns any ornamental details
- Neutral tones with bold splashes of accent color

## Eclectic

- Freedom to combine your favorites
- Varied style elements that relate in color, shape or finish

## YOUR BATH: SURROUND YOURSELF IN COMFORT.

Whether you're looking for a faucet for a powder room or outfitting a complete glamour bath for your master suite, Moen has a bathroom collection to suit every taste.

Our bath lines range from clean and contemporary to Old World styling and encompass everything in between. All are available in a variety of on-trend finishes, and products within each suite range from one- and two-handle faucets to Roman tub faucets, showers, vertical spas and more. To complete your room, you'll also find accessories designed to match your fixtures.

### BATH FAUCET MOUNTING OPTIONS

#### Consider these tips as you narrow in on your selection:

- Before you buy your faucet, measure your sink and faucet to determine what configuration will fit. Faucets are measured by the distance between mounting holes – center-to-center. Most centerset and mini-widespread faucets measure 4" centers, while widespread faucets range from 8" to 16" centers.
- Vessel sinks require a taller faucet. Some models are made exclusively for this purpose, while others offer extension kits to add additional height. An alternate option is to pair your vessel sink with a wallmount faucet.

## CHANGE STYLES, NOT PLUMBING

Styles are constantly changing. That's why Moen invented the patented M•PACT® common valve system. With M•PACT, you can upgrade your style of faucets without having to change your plumbing underneath the cabinet

or behind the wall. Simply unscrew the handles and spouts, remove trim pieces and replace them with a new finish or a completely different design. M•PACT is available in lavatory faucets, tub/shower faucets and Roman tub faucets.

## SHOWERING OPTIONS

Personalizing your shower is more than selecting a trim style and finish. Customizing your shower with components and functionality that are perfectly suited to your individual needs and desires is the best way to create a shower that you'll love.

From multifunction fixed showerheads to versatile hand-held showerheads and relaxing rainshowers, Moen® components are designed to work together so you can create a complete showering system.

**IMMERSION**  
rainshower technology

**InvigoRain**  
PRESSURIZED SPRAY™

### FULL PRESSURE RAINSHOWER

Moen enhances your shower experience with innovative Immersion® Rainshower and InvigoRain™ technologies, which use self-pressurizing channels to magnify the force of water uniformly across the entire spray face of your rainshower. This creates three times more spray power than most rainshowers and eliminates the low-pressure drooping effect. The result is an exhilarating, rain-drenching experience with maximum performance and coverage.

## THE EASY DIGITAL INDULGENCE: ioDIGITAL™

From DVRs to dashboard navigation systems, you're surrounded by technology designed to make life easy. With the introduction of ioDIGITAL, Moen brings the benefits of technology to the bathroom.

Best of all, ioDIGITAL is proof that advancements in technology don't have to be intimidating or overly complicated. With intuitive controls and simple operation, Moen made ioDIGITAL as easy as it is innovative.

For example, the ioDIGITAL controller lets you dial in and maintain both temperature and flow with electronic precision. Plus, sleek LED indicators visually display your settings. ioDIGITAL puts you in complete control.

ioDIGITAL makes creating a truly personalized shower or bath simple. Once you have achieved your preferred combination of temperature and water delivery, you can recreate that exact experience any time you desire with the touch of one button. Up to three other users can do the same. Luxury is literally at your fingertips.

### VERTICAL SPA

The ultimate blend of technology and luxury. The ioDIGITAL vertical spa controller puts you in command of precise temperature and flow, four custom presets and one-touch activation of multiple water spray outlets as well. Switch from shower to body spray, tub spout, hand shower or rainshower: Or choose them all.

### SHOWER

ioDIGITAL can make your shower feel great even before you get wet. Call up your preferred temperature and flow at the push of a button, and wait for the LED indicators to tell you when your shower matches your settings. No cold shocks or scrambling to adjust handles the instant you step in.

### ROMANTUB

Imagine having someone to draw you a bath every day. ioDIGITAL will. Push your preset, close the drain, and go light a few candles. ioDIGITAL will have your tub filled to the perfect temperature and level whenever you're ready to slide in. A handy top-off feature warms your bath with the touch of a button.

## THE HEART OF PERFORMANCE: MOEN SHOWER VALVES.

Valves are the “engines” of your shower. They deliver the desired amount of water at the optimal temperature, pressure and flow rate to the spray outlets you want to use. In addition to ioDIGITAL™, Moen offers several valve options to suit your needs and desires.
